It is no news that sexuality is one of the most important aspects of human lives, therefore it is only natural to want to know more about the sexuality traits of the different Zodiac signs. There are 12 zodiac signs and each has its own specific and special traits. This article seeks to answer certain questions such as:

- **What kind of environment would increase a sexual change for each sign, what kind of ambiance (character and atmosphere of a place).**
- **What is your body language if you want them to be sexually interested.**
- **What do you say to get each sign in the mood.**
- **What kind of things do you say during foreplay making them want more.**
- **What kind of things you say during sex.**
- **What kind of sex is titillating to each sign and what you can do to make sex with each sign better.**

Now, let us answer this questions as they are related to each zodiac sign.

1. ARIES (MARCH 21 - APRIL 19).

As the first sign in the zodiac, the presence of Aries always marks the beginning of something energetic. Ruled by the God of War and prideful of their spot as the first of all of the fire signs, Aries men and women are known for their hot tempers, bold gestures and their uncomplicated and carefree approach to getting down and dirty.

- **What kind of ambiance would increase a sexual change for Aries?**

An aries man or woman loves adventure and trying new things, it is only natural that they thrive sexually in places of adventure and fun. Boring places and atmosphere is a major turn off for them, they really love the fun. Some might even say 'weird' things and places turn them on. Aries men and women are impulsive, impatient and spontaneous in all areas of their lives, including the bedroom (or the kitchen, the balcony or hotel bathroom). They want it when they want it, which, again, is now and often.

- **What is your body language if you want Aries to be sexually interested?**

As natural leaders, they are really adventurous and bold. Flip your strategies —alternate between appearing timid or shy and flirting outrageously with them. In simple words, they love the chase. Mind games, philosophical debates are big “ NO” for Aries. They like passion and energy. You don't need to be too intellectual to attract them rather focus on how you can get their blood pumping. Aries men like vulnerable women but it doesn't mean they like needy ones. Understand the difference and act accordingly.

- **What do you say to get Aries in the mood?**

While at times its about what you do, you don't need to mince words with aries, they are very straightforward so just go straight to the point! "I think sex with you would be great". They really don't like it when you beat around the bush so be direct.

- **What kind of things do you say during foreplay to make Aries want more?**

Foreplay is very important in sex no doubt. Aries are straightforward people, therefore foreplay talk with them should be too. Tease and taunt them of course but do not overdo it, that might just be a major turn off for them. "I love the way you twitch when I use my tongue", "..you look great when you moan that way".

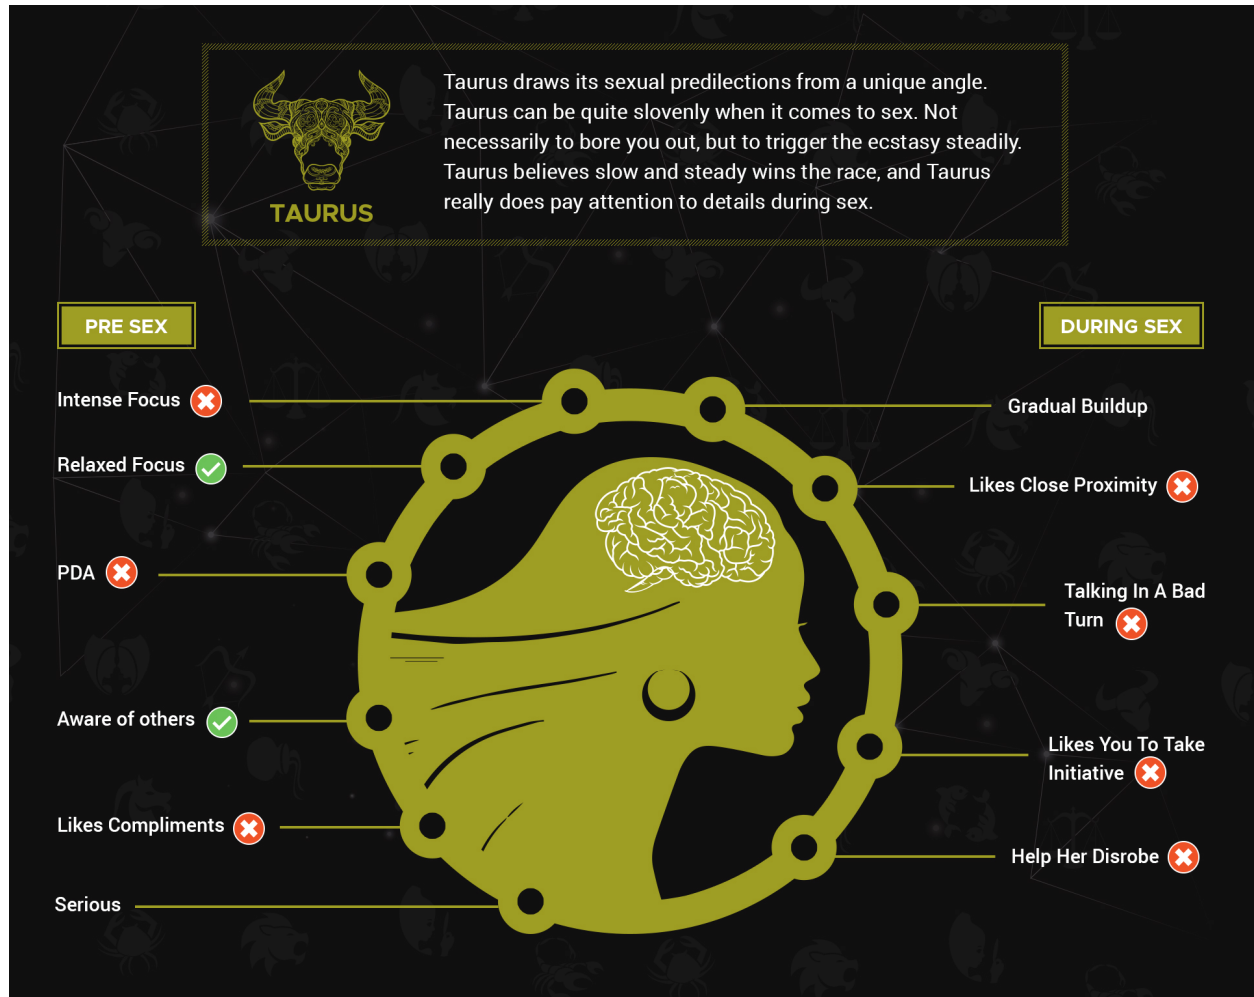

- **What kind of things do you say during sex?**

Aries are straight-forward when it comes to sex, and that's exactly how they like their dirty talk. Go for the world's most evocative four-letter word and use it to describe what you want your Aries to do to you. And don't hold back. "F*ck me. I love the way you f*ck me."

- **What kind of sex is titillating to aries and what can you do to make sex with them better?**

Take it or leave it, aries likes sex a lot. They can be a bit aggressive in bed. They hold nothing back, pouring all their energy into the act of sex and they expect the same in return. For the Libra, the act of making love is not the ultimate goal it is for others. They enjoy it, but Librans treasure the ramp up more. You can count on Librans giving just as they get while in bed with a lover. They're happy to be either on the giving end or the receiving end of sex – all that matters is that things are fair and equal. The Goat may not be known as the sexiest of beasts, but once it overcomes its initial reserve and caution, it can usually be relied upon to give full satisfaction, no matter how long it takes. As with most other things in its life, Capricorn prefers to take its time over its lovemaking, and its highly developed self-control gives it the stamina to stay the course. The bedroom is expected to be a stress-free zone, where there is one goal in mind – mutual pleasure. The Capricorn's love of structure also makes him or her ideal for taking on a dominate role while making love. If you want good sex with a Capricorn, the first rule is never, ever to make fun of them, not even in a good-natured way. Easily embarrassed and often lacking in confidence, many Capricorns tend to be a bit self-conscious about their sexual performance. Any kind of implied criticism will dampen their libido – and maybe finish your relationship for good.

11. AQUARIUS (JANUARY 20 - FEBRUARY 18).

Because Aquarius is turned on by that which is new and different, sexual relationships with this star sign do, however, need to be kept constantly fresh and alive.
